ISO 9001/14001

ISO 9001 is the internationally recognized standard for the quality management of businesses which is set by the International Standards Organization(ISO). It applies to the processes that create and control the products and services, and prescribes systematic control of activities to ensure that the needs and expectations of customers are met. The assessment is performed through the third-party audit. ISO 14001 is one of the comprehensive set of environmental management standards set by the International Standards Organization(ISO) to address environmental issues. This standard provides organizations with a structure for managing and improving environmental performance. The program provides third-party audits to evaluate our environmental management system.

KS(Korean Industrial Standards)

The Korean Industrial Standards is a program to realize improvement of product quality and productivity, simplification and standardization of transactions, and protection of consumers by means of supplying and utilizing the industrial standards which is established for industrial standardization and national standardization of Korea.

Eco Label

The Eco-Labeling Program aims at providing accurate environmental information to consumers and inducing firms to develop and produce environment-friendly products in line with consumers' preferences by affixing the Eco-Label on products causing relatively less pollution or using less resources in the production and consumption processes among products for the same purpose.

Excellent Quality Competitive Enterprises

It is a system to select, support and advertise companies with good performances by re-evaluating and confirming the results of self-assessment conducted by companies. For this, an evaluation group which is composed of academic and industrial experts make on-the-spot visit and implement evaluation based on the arranged quality competitiveness criteria for construction, manufacturing and public service business. Supervision: Ministry of Knowledge Economy, Korean Agency for Technology and Standards / Korea Standardization Association

KC

It is a system to select, support and advertise companies with good performances by re-evaluating and confirming the results of self-assessment conducted by companies. For this, an evaluation group which is composed of academic and industrial experts make on-the-spot visit and carry out evaluation based on the arranged quality competitiveness criteria for manufacturing, construction and public service business.

GOOD DESIGN AWARD

The 'Good Design Award' was established in 1985 to facilitate the development of product designs. Under the Industrial Design Promotion Act, the award grants GD(Good Design) mark to superior products after comprehensively examining the aesthetics, functionality, economic values, etc. of the products by the Ministry of Knowledge Economy.

NFS(National Sanitation Foundation International)

NFS is a global certification body which sets rigorous evaluation standards for household products and industrial supplies related to public sanitation and environment and carries out assessment regarding safety and performance based on a neutral position.

JIS(Japanese Industrial Standards)

JIS is an abbreviation of Japanese Industrial Standards which sets standards such as test methods to verify type, size, quality, performance and safety, etc. of the products. It is used as an indicator for transactions between companies and public procurement and consumers to purchase products with an easy mind as the JIS mark indicates that the product having JIS mark satisfies the standards of JIS. A new JIS mark certification system has been enforced since October 01 , 2005 according to the amendment of the 'Industrial Standardization Act' in October 01 , 2005.

iF DESIGN AWARD

iF Design Award is one of the world's top three international design contest, along with RED DOT of Germany and IDEA of USA. It began in 1953 in Germany, and is organized by International Forum Design.

Green Star

The Green Star is a system set by the Korea Management Association Registrations & Assessments Incorporation(KMAR). A total of 15 products / services are selected as environmental friendly product / service based on the results of various assessment for 406 brands of 93 product groups by consumers and experts.

Korea Standard - Quality Excellence Index (KS - QEI)

The KS-QEI is a comprehensive index developed by the Korea Standards Association and the Korean Society for Quality Management to measure product quality by reflecting the levels of customer satisfaction with products and their characteristics. To compile the index, the two organizations conduct a survey of customers and experts on the quality of and satisfaction with products.

Korea Luxury Brand Awards

It is a prize awarded to excellent products which are differentiated in terms of quality, function, design, market and services, etc. The prize winners are selected by Korea Prestige Brand - Customer's Recognition Index(KPC-CRI) and the Korea Prestige Brand - Characteristic Valuation (KPB-CV) which are conducted by the Open Management Research INC. and Secretariat of the Korea Luxury Brand Awards.

PIN UP DESIGN AWARD

At first, the 'PIN UP Design Award' was called as the 'Korea Industrial Design Award' which was held initially in 1997 and has contributed to the development of industrial design of Korea. In 2008, the name is officially changed to 'PIN UP Design Awards' and started the 2nd taking- off. Since then it is recognized as a world-class design festival with attracting many designers from all over the world and finding out various designs.

reddot design award

It is one of the world's top three international design contests with a long tradition and history. It is acknowledged as a prestigious guarantee system as the winners joins the ranks of world's top designers once they are awarded at this contest.

History

We take strong leaps to create a world-renowned masterpiece bathroom culture with passion and challenging spirit that have led the bathroom culture of Korea

Jeungpyeong factory

Dobidos factory

View of Daelim Trading Headquarters

Jeungpyeong factory's slogan 'Quality First'

Launch of Daelim Trading Co., Ltd.

1970.04. Daelim Trading Co., Ltd. established
1972.11. Prime Minister Award for achieving export goals
1972.12. Construction of western tableware factory in Yeongdeungpo completed
1973.04. Fittings factory constructed in Yangpyeong-dong, Yeongdeungpo-gu

Business diversification for growth

1975.11. Launch of Daelim factory in Incheon
1975.11. Public offering of Daelim Trading Co., Ltd.
1976.04. Fittings factory becomes first in the industry to obtain KS mark
1978.12. CEO Lee Jae Woo wins Presidential Industrial Medal for development of export and industry
1979.11. Wins presidential medal as company of merit in export promotion policies

New challenges in the changing age

1980.09. Fittings factory In Yangpyeong-dong transferred to Geomdan-myeon in Gimpo
1981.12. CEO Lee Jae Woo wins 50 million dollar tower as company of merit in exports
1983.11. Fittings factory develops single-lever type mixed faucet and thermostat shower faucet for the first time in Korea
1983.12. Wins iron tower Industry medal presidential award
1985.10. Faucets obtains Canada industry standard certificate CSA for the first time in the industry

Establishes four major industry systems of stability and growth

1988.12. Acquired Gimpo ceramics factory of Hanwha Corp
1989.04. Changed the name Daelim Sales Co., Ltd. to Living Star Co., Ltd.
1990.06. Established Indonesian joint venture PT. DDI
1991.05. Obtained sink faucet FS510 G.D mark

Organizational innovation and successful overcoming of IMF

1992.11. Releases electronic bidet for the first time in Korea
1994.05. Establishes first Chinese joint corporation X.G.S.F
1995.08. Obtains IAPMO certificate for the first time in Korea
1999.01. Changes name from Indonesia PT. DDI to PT. DLI
1999.10. Obtains bidet (DB-752N) European Union Safety Standards (CE)
1999.11. Obtains bidet (DB-400) USA safety standards (UL/C-UL) certificate

Daelim Trading Co., Ltd. developing into a global corporation

2001.12. Fittings factory obtains Japanese JIS certificate
2002.10. Company moves from Susong-dong in Jongro-gu to Yeonhee-dong
2003.01. Company name changed from X.G.S.F to DBM
2008.09. ISO 14001 Environment Management system certificate obtained
2008.12. Approval to use Environment approval certificate (78 types of items)
2009.11. Wins presidential award in 2009 National Quality Management Competition
2009.11. Selected as 2009 good design (GD) product and wins award (FB6100 and the like)
2010.03. Wins reddot design award product design 2010 (in two categories)
2011.03. iF Design Award, GERMAN Design Award, and Wins best prize in environmentally friendly brand
2011.11. Selected as competitive company in quality competitiveness for 13 consecutive years and dedicated the hall of fame of good corporation for competitiveness in quality
2012.04. Wins Korea's Masterpiece Brand award
2012.05. Wins reddot design award product design 2012
2013.11. Jeungpyeong factory moves (the largest in the eastern world)
2014.10. Nominated as the final supplier for 100 thousand housings in the new city of Bismaya, Iraq
2014.12. Dobidos advertisement wins the first prize in creative category in <2014 Constructions Economy Advertisements award>

Pride

Selected by Ministry of Knowledge and Economy as Excellent Quality Competitiveness Enterprise consecutively since 1997 Dedicated to the Hall of Fame for the first time in the industry

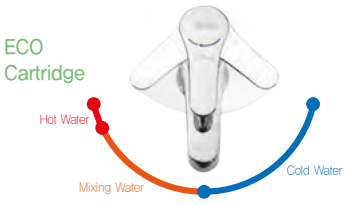
ECO Energy Saving Faucet

What is the ECO Cartridge?

Usually, in case of the single lever mixing faucet, both hot and cold water are controlled by the same handle. Shifting the handle to the right controls cold water, and shifting it to the left controls hot water. And, the center is for the mixing water. However, in case of the ECO Cartridge of the Daelim Trading, the right-to-center section of the lever is for complete cold water. Therefore, it is possible to reduce the use of hot water which is wasted unconsciously.

Energy Saving Single Lever Faucet

Energy saving faucet is a product to save energy by controlling the hot water which is wasted unconsciously. (The right-to-center section of the lever is for complete cold water)



Effectiveness of the Eco Cartridge (Sources: Ministry of Economy, Trade and Industry(METI), Ministry of Land, Infrastructure, Transport and Tourism(MLITT))

Category	Water Use Amount	CO_2 Emission	Gas Use Amount	CO_2 Emission	Total
Existing Cartridge	39,000l	23Kg	120.0㎥	264Kg	287Kg
ECO Cartridge	32,400l	19Kg	99.6㎥	220Kg	239Kg
Reduction Amount	6,600l	4Kg	20.4㎥	44Kg	48Kg

- Amount of hot water used is reduced up to 17% per year.
- Up to 48kg of CO_2 emission amount is reduced per year.

- Water supply and water hold operated by a touch of human body parts.
- Consists of faucet sensor, controller (PCB, Solenoid Valve), and power source (ADAPTER)
- Blue LED is lit only when operating to supply water

- Power : AC 220V/60Hz, DC 9V(constant voltage adapter 600mA used)
- Touch sensing time : within 0.5sec
- During operation: Blue LED ON.
- Automatic water hold: Automatically holds water when not used for 3 minutes.
- Initialization operation : flickering three times when initial power Is input

Whirlpool bathtub automatic reel device

STORAGE TYPE FAUCET

Storage type faucet •

We propose practical and functional shower products that are helpful in utilizing small space in line with the changing trend towards downsizing of residential places and reasonable expenditure trends.

- The basic neat box form provides a sense of practicality.
- The multiple-layer structure providing storage space and storage pockets at the side increase practicality and usage.
- Glossy white finishing has a feeling of purity and cleanliness. And the chromium edge that surrounds the main body not only serves as a hanger but also increases the completeness in terms of design.

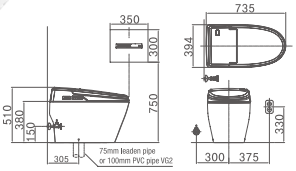
BIDET

Dobidos
Bidet / Sensor

All-in-one Type

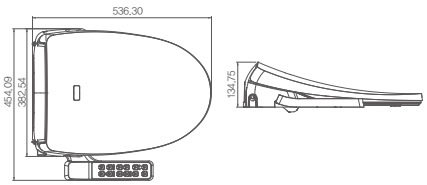
DB 9600

Remote control model



Seat Type

DB 4000 series
(ECO-BE)



Standby Power
It is economical product to save electricity bill by using the standby power.

Short Circuit Block-off
It is safe to use as it automatically cuts off the power supply when short circuit happens.

Anti-fouling / Anti-dust Design
It is strong against contamination and moisture.

Automatic Motion Sensor
It is convenient as it senses the movement automatically

Super Power Saving Function
It helps to reduce the use of electricity up to 40% with the super power saving function.

Continuous Hot Water
It is convenient and economical as it is possible to use the hot water continuously.

Triple Overheating Protection Device
It is safe as it adopts the triple overheating protection device.

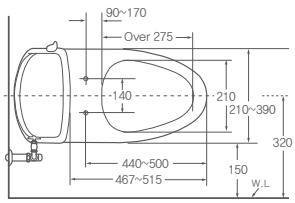
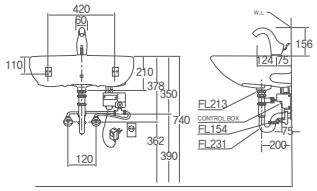
Installation Condition



Lavatory Sensor Faucet

FL 501 (Battery Type)
FL 501E (Electricity Type)

- SIZE : 182(W)×156(H)×60(D)
- Voltage : AC 220V / 60Hz, DC 6V
- Water Pressure : 0.7~7.0kgf / cm²

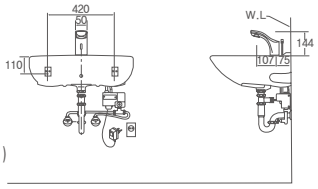


Lavatory Sensor Faucet

FL 511 (Battery Type)
FL 511E (Electricity Type)

- SIZE : 160(W)×144(H)×50(D)
- Voltage : AC 220V / 60Hz, DC 6V
- Water Pressure : 0.7~7.0kgf / cm²

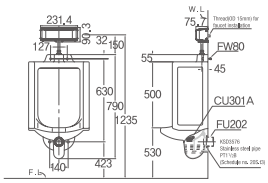
(No LED for the battery type)



Exposed Urinal Sensor

FU 710 (Battery Type)
FU 710E (Electricity Type)

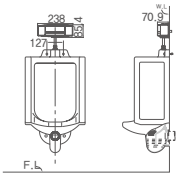
- SIZE : 240(W)×80(H)×70(D)
- Voltage : AC 220V / 60Hz, DC 6V
- Water Pressure : 0.7~7.0kgf / cm²



Exposed Urinal Sensor

FU 720 (Battery Type)
FU 720E (Electricity Type)

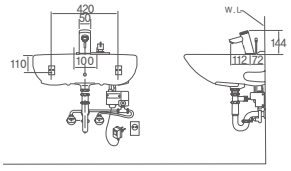
- SIZE : 240(W)×85(H)×70(D)
- Voltage : AC 220V / 60Hz, DC 6V
- Water Pressure : 0.7~7.0kgf / cm²



Lavatory Sensor Faucet

FL 406S (Battery Type)
Including soap dispenser
FL 406ES (Electricity Type)
Including soap dispenser

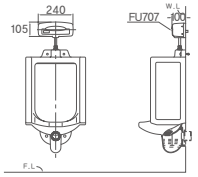
- SIZE : 50(W)×144(H)
- Voltage : AC 220V / 60Hz, DC 6V
- Water Pressure : 0.7~7.0kgf / cm²



Exposed Urinal Sensor

FU 707A (Battery Type)
FU 707E (Electricity Type)

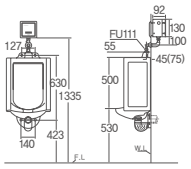
- SIZE : 240(W)×105(H)×100(D)
- Voltage : AC 220V / 60Hz/DC 6V
- Water Pressure : 0.7~7.0kgf / cm²



Built-in Urinal Sensor

FU 607 (Battery Type)
FU 607E (Electricity Type)

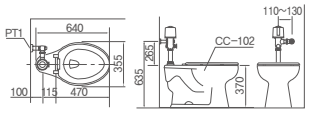
- SIZE : 135(W)×135(H)
- Voltage : AC 220V / 60Hz, DC 6V
- Water Pressure : 0.7~7.0kgf / cm^2



W.C Sensor Flush Valve

FC 100-8 (Battery Type)

- Voltage : DC 6V
- Water Pressure : 1~5kgf / cm^2 (Water Closet)



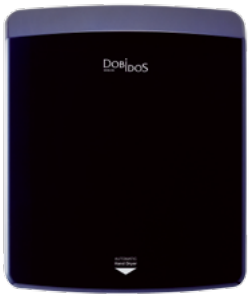
DX 2000 RED

- SIZE : 300(W)×520(H)×170(D)
- Voltage : AC 220V / 60Hz
- Power Consumption : Max. 1300W (When the heater works)

DX 1000

- SIZE : 300(W)×520(H)×170(D)
- Voltage : AC 220V / 60Hz
- Power Consumption : Max. 1300W (When the heater works)

FL 380 NAVY



- SIZE : 255(W)×306(H)×181(D)
- Voltage : AC 220V / 60Hz
- Power Consumption : 1070W

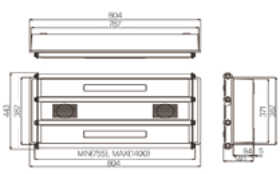
FL 370

- SIZE : 255(W)×306(H)×181(D)
- Voltage : AC 220V / 60Hz
- Power Consumption : 1070W

Electrically Powered Laundry Drying Rack

DD 600

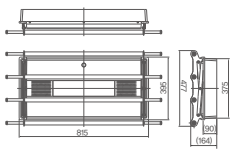
- Voltage : AC220V 50/60Hz
- Power Consumption : Less than 0.7W on standby, Less than 80W during operation
- Weight Application : 35Kg
- Light : LED lamp, Timer for 30 minute's operation
- Remote Control / Switch : Ultraviolet ray remote control / wall-mounted (operating line 2p)



Wall-mounted switch (optional)

DD 500

- Voltage : AC220V 50/60Hz
- Power Consumption : Less than 1W on standby (Less than 200W during operation)
- Weight Application : 35Kg (MAX 40Kg)
- Light : Triple wage length lamp(1EA), Timer for 30 minute's operation
- Remote Control / Switch : Ultraviolet ray remote control / wall-mounted (operating line 2p)



Wall-mounted switch (optional)
